

TT190503 – FUP - Graphic Slideshow

1. Our controller is so powerful that it can do many things, where others can only be done using the BMS server software running on a PC. One example is the graphic slideshow.
2. With the help of the graphic elements Dialog06, we can easily create a graphic slideshow for up to 50 graphic pages, and show it on a big LED TV with HTML5 browser support directly
3. First, create a new FUP page, called “slide.f”, open it and add the program like this

4. I01 is the number of graphics for the slideshow. I02 is the number of seconds between slides.

Properties INPUT <-> UI

General Access/Option Info

Type: UI Name: I01 Updating: Read and write

Bus: Simulation value: 3

Pre-text: Slides Post-text:

Default value: 5 Min: 0 Max: 65535

Factor: 1,0 Offset: 0

Pre-comma: 3 Post-comma: 0

Properties INPUT <-> UI

General Access/Option Info

Type: UI Name: I02 Updating: Read and write

Bus: Simulation value: 10

Pre-text: Second Post-text:

Default value: 15 Min: 0 Max: 65535

Factor: 1,0 Offset: 0

Pre-comma: 3 Post-comma: 0

5. D01 is the current graphic displayed

Properties Display <-> FL

General Access/Option Info

Type: FL Name: D01 Updating: Read

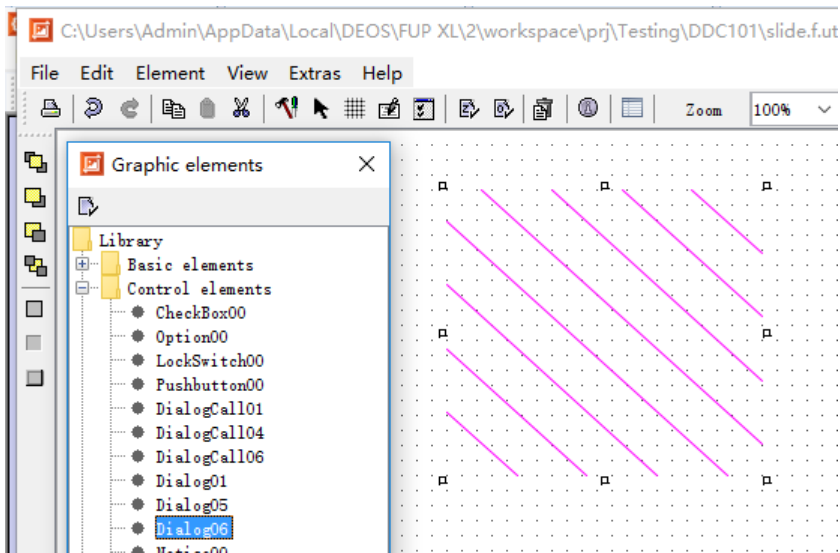

Bus: Simulation value: 1

Pre-text: Current Post-text:

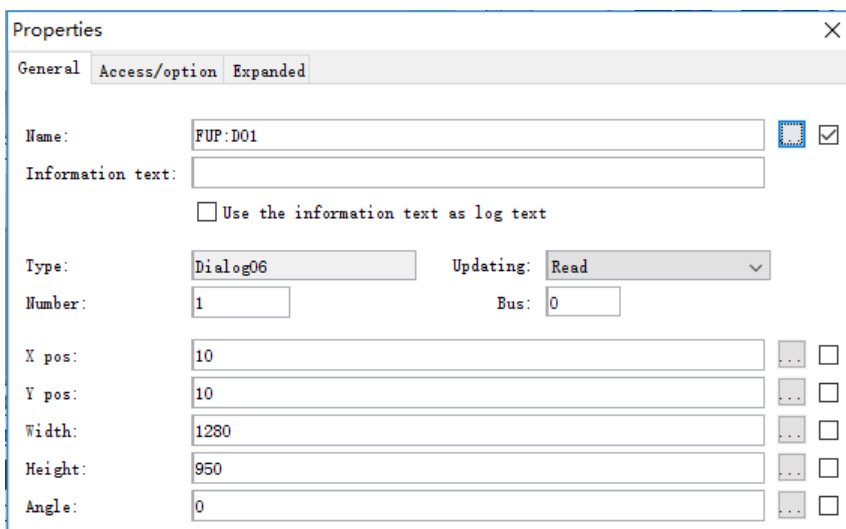

Default value: 0 Min: -200000 Max: 200000

Pre-comma: 3 Post-comma: 0

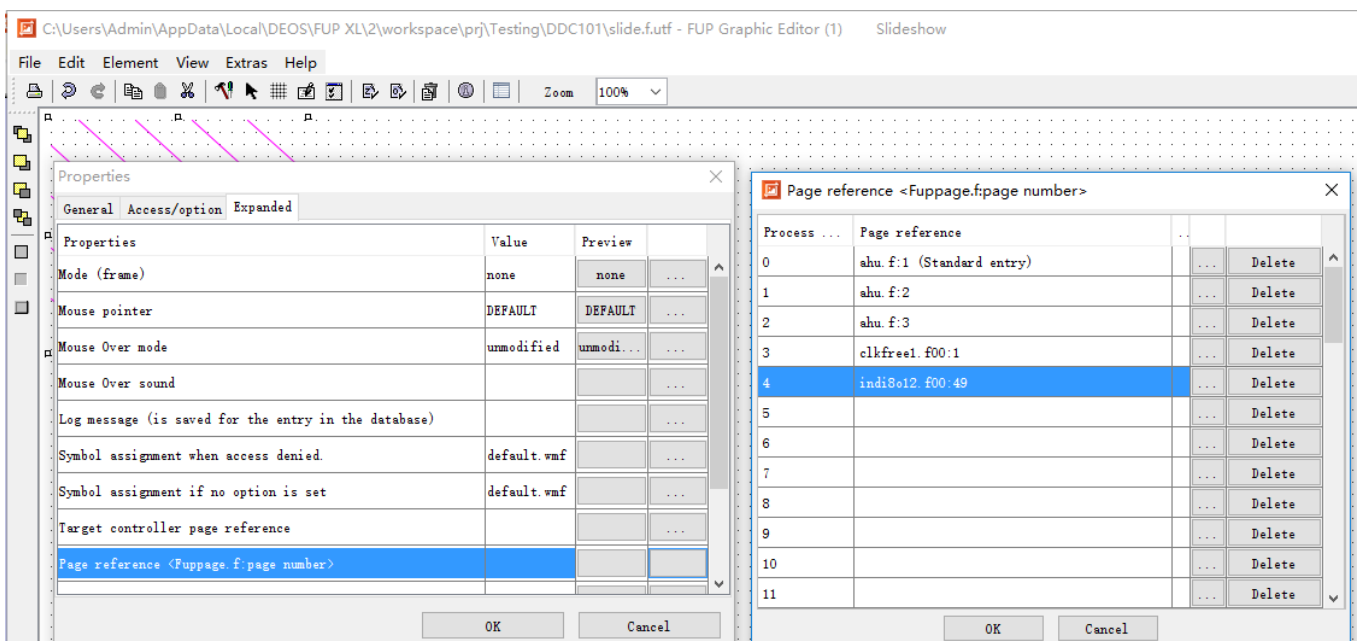

- Now create a new graphic page, call it “Slideshow”. Add a “Dialog06” graphic element from ‘Control Elements’ to your graphic page

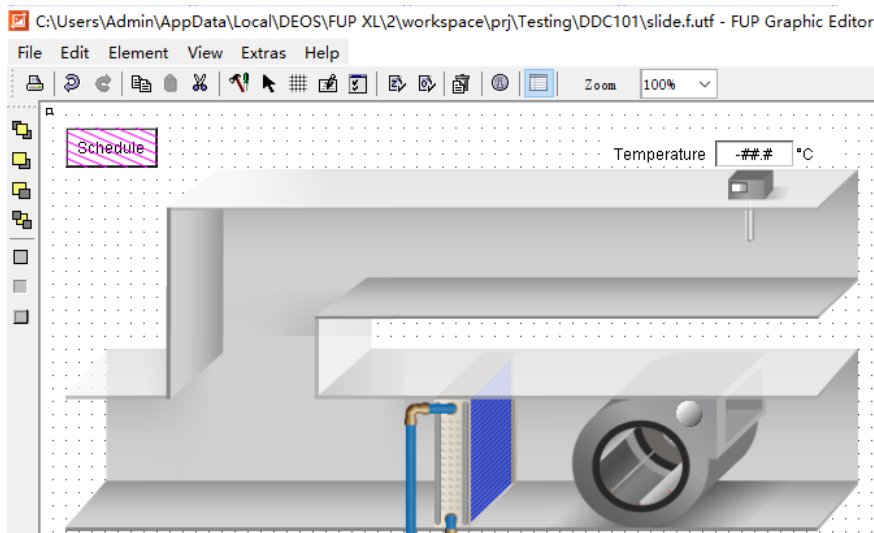

- Double click on it, link it to D01 in your FUP page, by clicking on the “...” button.

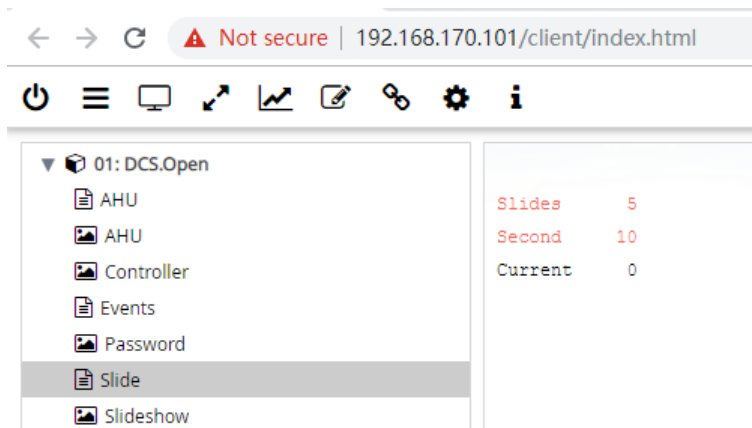

- Go to the “Expanded” tab, click on the “...” icon next to “Page Reference <Fuppage.f:page number>”, select the graphic pages you want to show in the slideshow

9. You may need to resize your Dialog06 so that it's bigger than all your graphic pages

10. Now you can use a browser to view the slideshow. You can set the number of slides, and the time (second) between each slide in the text page (Slide)

11. Here is the slideshow. You can click the  button, to hide the menu bar, and tree, and then select full screen mode in your browser to make them clear except your graphics
