

TT190501 – FUP - Make a 3D style Table in Graphic

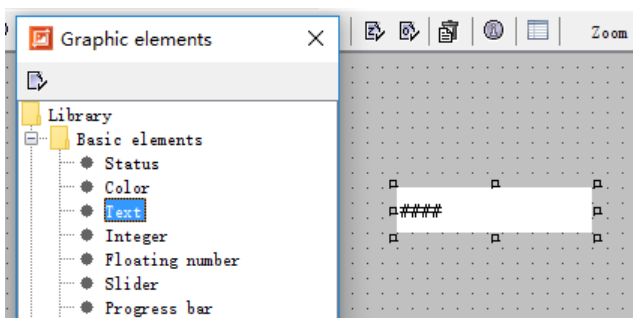

1. We are going to show you how to create a 3D style table easily in FUP graphic page, like this

Name	Input	Output
AHU-1F-01		
AHU-2F-01		
AHU-3F-01		

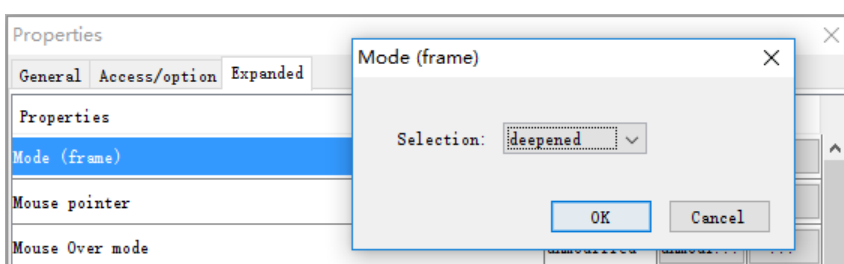

2. First open the “AHU.f” FUP page and add a new graphic page call “Table”. Change the background color to grey in menu “Extra”, “Options”

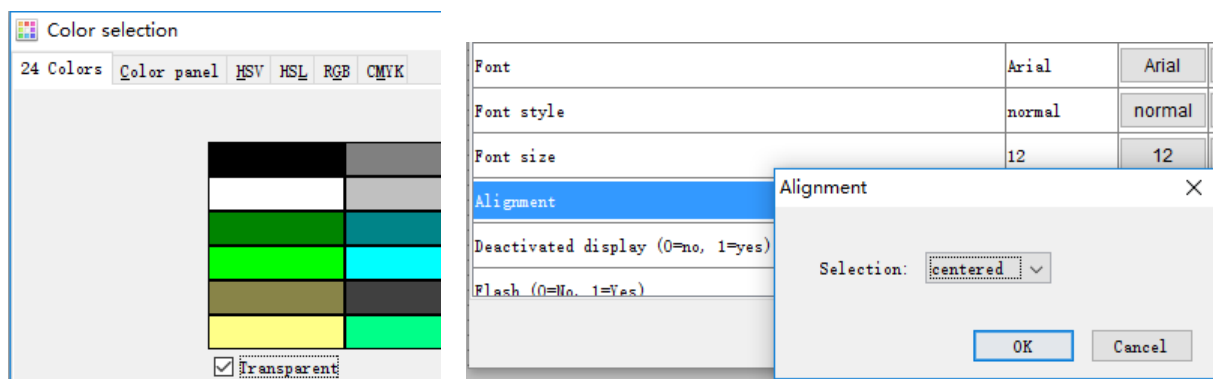

3. Open the “Graphic Elements” window from menu “View”, “Graphic Elements”. Under “Basic Elements”, click on “Text” and draw a rectangle on your graphic page

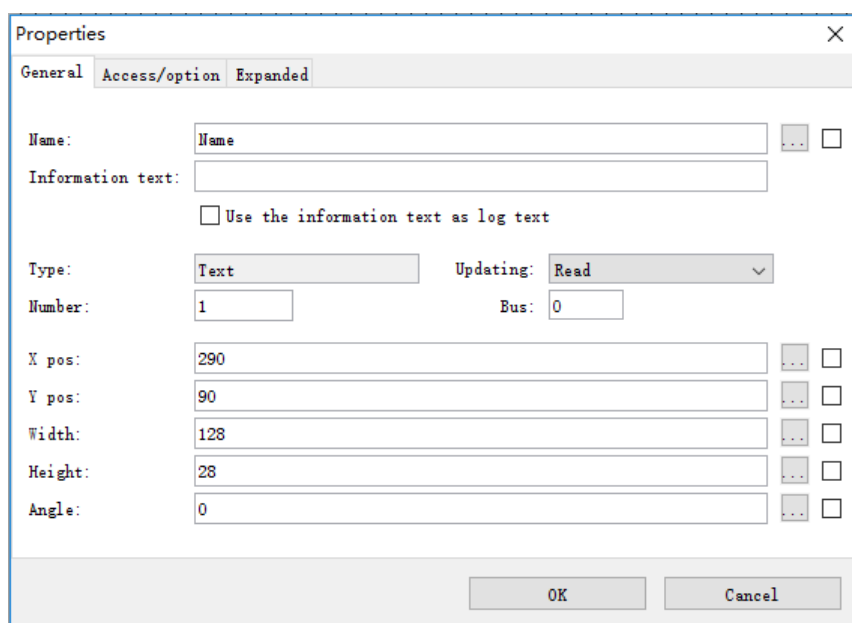

4. Double click on the text element to change its properties. First change the “Mode (frame)” to “Deepened”

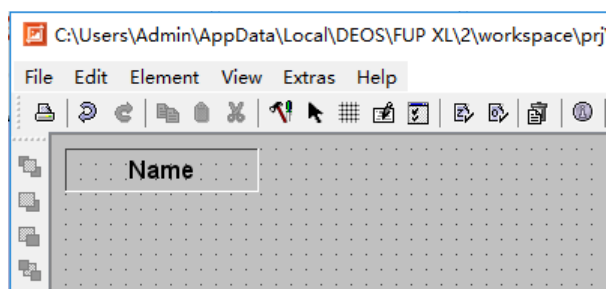

- Set the background color to “Transparent” and alignment to “Centered”. Set the font, style and size as you like

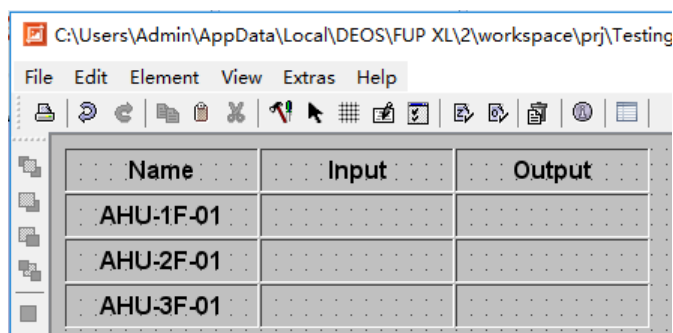

- Now click on the “General” tab, type in the text you want in “Name” and change the width and height to n-2. In this example, we change the width from 130 to 128, and height from 30 to 28. This can create the 3D effect for the table

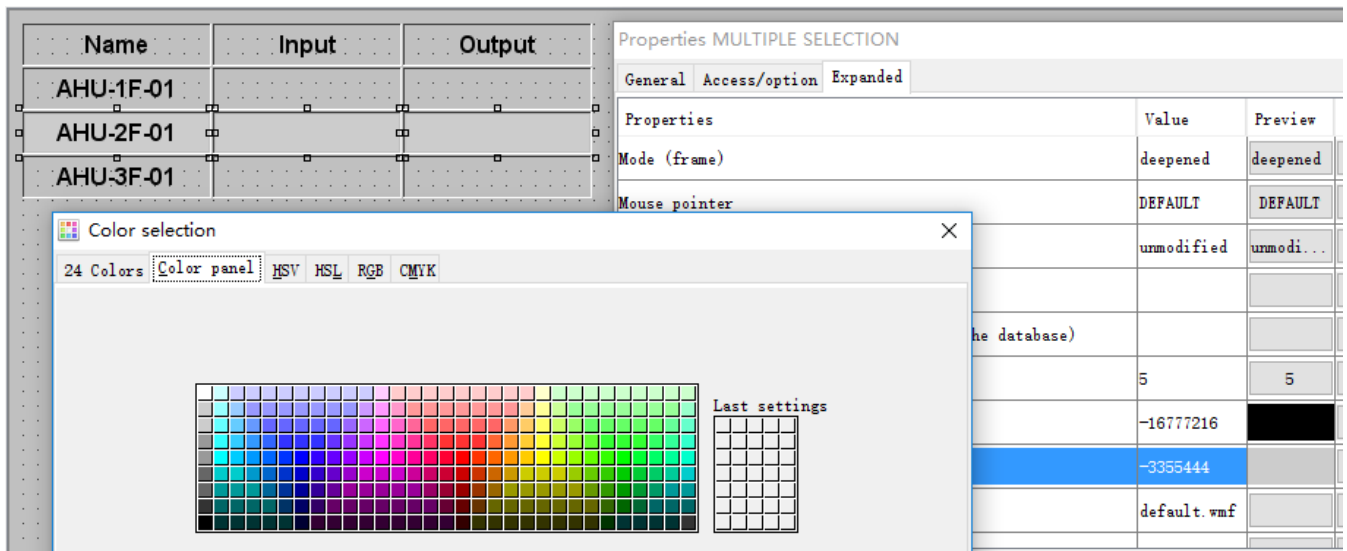

- This is how it looks like

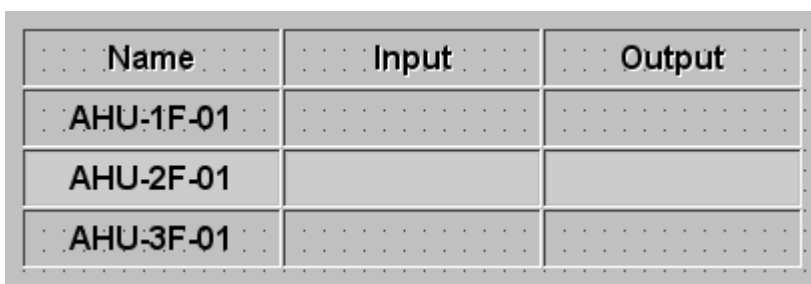

- Now copy and paste this, and put it in a table form, change the text and it will look like this

9. If you have many rows, you can change the background color of the odd and even rows with a bit different color to make is easier to read in the “Color Panel” tab

10. To make a highlight effect of the title, you can copy and paste the title texts, remove the deepen effect, change the foreground color to white, shift it 1 or 2 pixels right and down (using Shift + Arrow keys), and put them to background using button 

11. If you want this highlight effect, please remember to change both elements when you need to change the text, by selecting them together using your mouse (drag-select).
12. It looks like this after upload to the controller
