# TT211003 – FUP - Search Element and Reference

1. If you have a large and complicate FUP pages, there will be many "Input" and "Display". Sometimes, it is not easy to find the one that you're looking for.

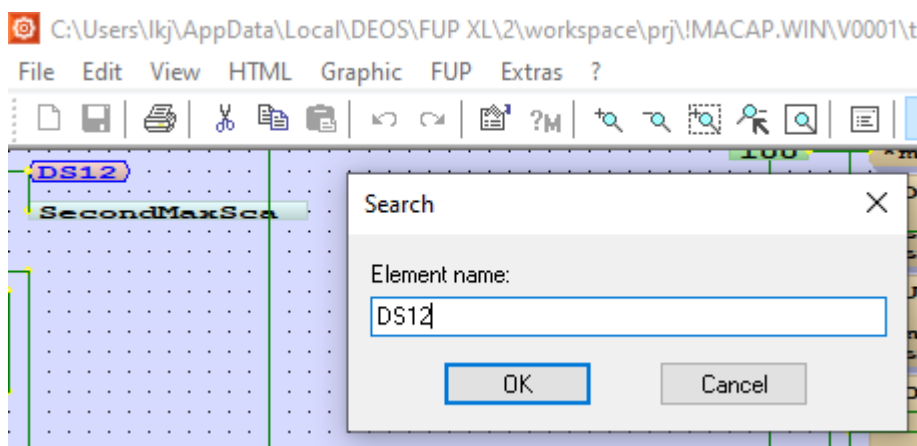

2. For example, in the graphic page, a graphic item is link to "DS12" and you want to find it in your FUP page.

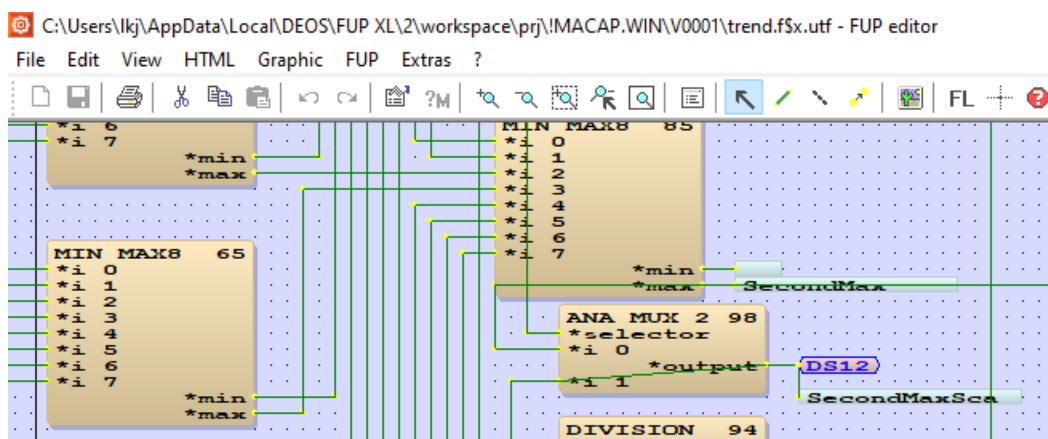

3. You can search it in FUP editor, by clicking "Edit" from the menu, and then click "Search Element".
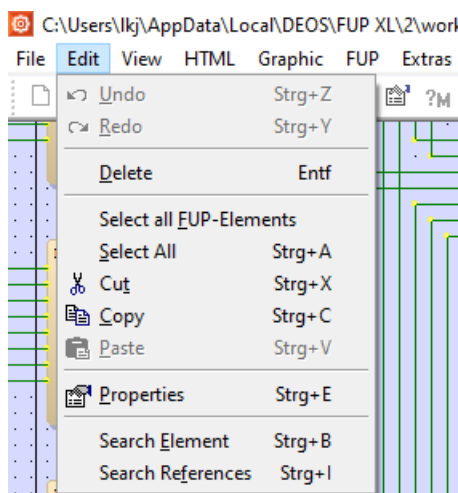

4. Type "DS12" and click OK, and it will come up on the top left corner in FUP editor.

5. Move it to the center and then you can see the function blocks and connection details.

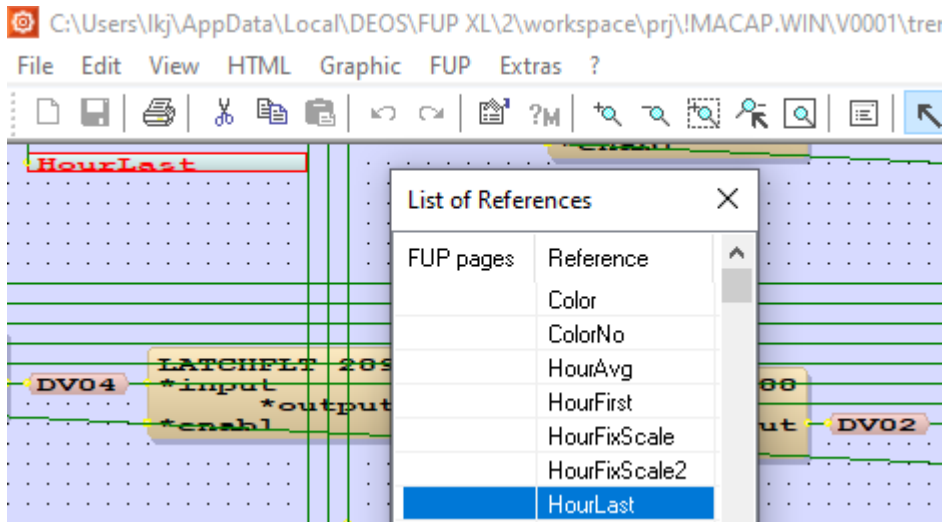

6. You can also search for "Reference" in FUP editor.

7. Click "Search References" from the "Edit" menu, and you can see a complete list of all references in the FUP page.
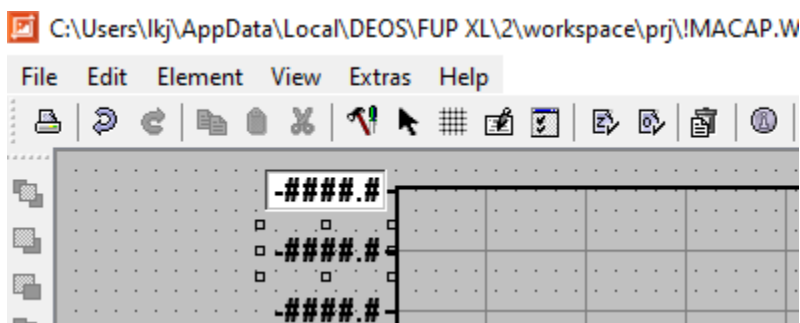

8. Double click on the reference you want to search for, and it will come up on the top left corner in FUP editor

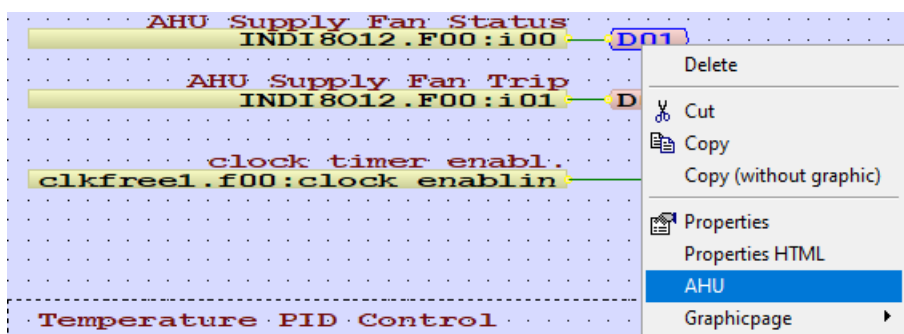

9. Also, if you want to find out where it is in the graphic page for an "Input" or "Display" in FUP editor. You can right click on it, click on "Graphic page" and it will show you all the graphic pages that contains the element.

10. Select the graphic page that you want to look at, and the element will be selected and highlighted for you.

11. Right click on the "Input" and "Display" can also show you the HTML page for it. In the example below, the HTML page is called "AHU".

12. Click on the HTML page name, and it will open up with the selected item highlighted in blue.
